SUMMARY

Senior backend engineer with 7 years of experience building and operating distributed Python services at scale. Deep experience with PostgreSQL, Kubernetes, and AWS production environments.

EXPERIENCE

Senior Backend Engineer, Northwind Logistics (2021 - Present)

- Designed and operated microservices handling 40M+ daily requests
- Led migration of core services to Kubernetes on AWS EKS
- Owned PostgreSQL schema design and query optimization for the orders service, cutting p99 query latency by 60%
- Built async task processing pipeline using Celery and SQS for order fulfillment
- Mentored 3 junior engineers on system design and code review practices

Backend Engineer, Fenwick Data Co. (2018 - 2021)

- Built REST APIs in Python/Flask for internal analytics platform
- Implemented caching layer with Redis, reducing DB load by 35%
- Set up Prometheus + Grafana dashboards for service health monitoring

SKILLS

Python, PostgreSQL, Kubernetes, AWS (EC2, S3, RDS, IAM), Celery, Redis, Docker, distributed systems design, OpenTelemetry, Prometheus, Grafana

EDUCATION

B.S. Computer Science, University of Washington (2018)
